

BUSINESS SUMMARY/EXPERTISE

Juno Management Professionals, Inc. (JMP) is a small, woman-owned firm specializing in project management and controls, engineering support and nuclear safety. JMP builds on the extensive legacy created by OLH Inc. since 1993. Rooted in the leadership, integrity and stability of an established company; we offer dedicated, qualified, seasoned technical professionals; and the irreplaceable firsthand knowledge of government operations and requirements. JMP is headquartered in Atlanta, Georgia and has additional offices in Columbia, South Carolina, Augusta, Georgia, and Huntsville, Alabama.

SUMMARY OF CAPABILITIES

JMP's Department of Energy (DOE) expertise comes from our key employees who lead major activities at DOE facilities. JMP provides engineering, technical, professional, information technology and management support services to DOE prime contractors, including a broad range of management and technical support from the initial planning and design stages, construction phase, through startup and testing, operations, maintenance, to project closure.

We specialize in providing comprehensive professional staff augmentation to support business operations. Our service offerings include safety analysis, engineering, technical, scientific, project management, construction management, project controls, and professional services to support government activities.

We have developed an exceptional recruiting system that has proven value to clients. Our recruiting staff has an in-depth understanding of the professional and technical contract labor marketplace, including the current compensation and benefits that must be provided to attract and retain qualified personnel. Through our proven recruiting and hiring strategies, we provide qualified personnel for immediate assignment and as a contingent labor pool for workload fluctuations and new task orders. Not only can we provide the immediate level of technical expertise needed, but we also possess the capacity to accommodate the potential peaks and valleys typical in staffing government contracts. This demonstrated ability to find the right people for the jobs, often overcoming market shortcomings, has become a reason our clients seek out JMP's support services.
